PROGRESS REPORT

EQIP champion name: Helen Sneath

Trust/Health Board team name: Nottingham University Hospitals Trust

Trust/Health Board team members:

Helen Sneath, James Baird, Maria Moran, Laura Ashmore, Manish Prasad, Denise Crozier,

Katherine Martin, Ann Brown, Francesca Napolitano

Project aim:

Achieve a full quality and interpretable routine EEG recording in 95% of all paediatric patients referred within 4 weeks from referral by May 2020'.

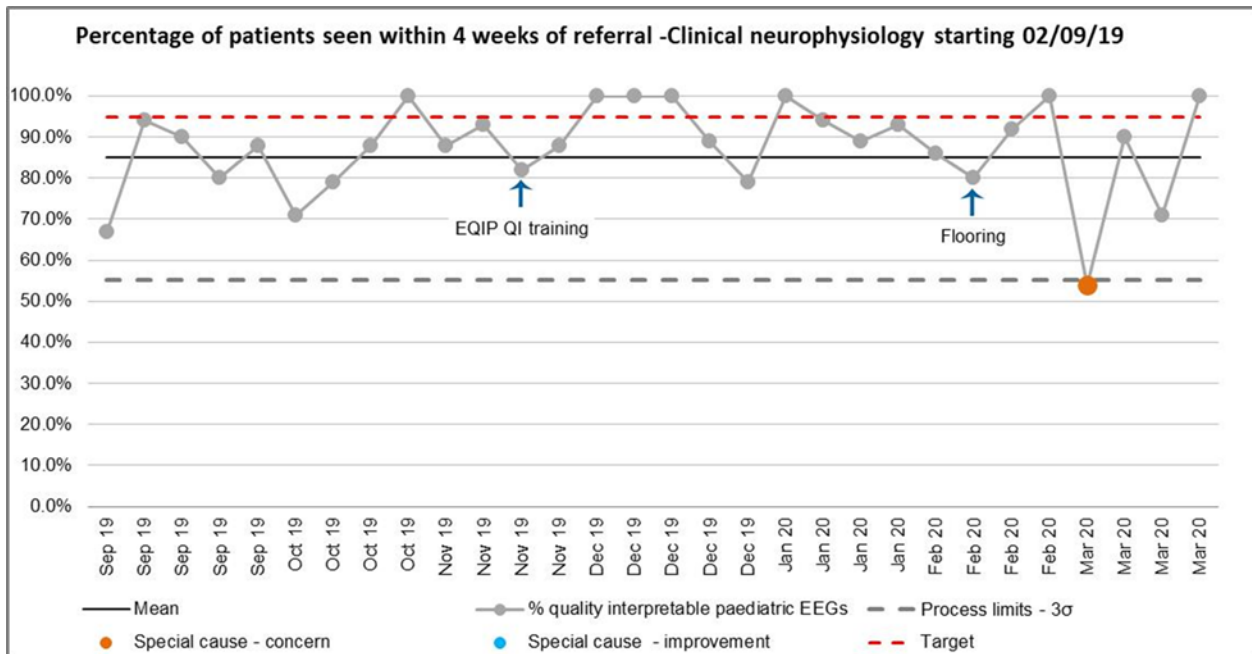

Planned tests:

1. Additional leaflet to go in patient leaflet with links to online resources – Evelina video, plus our adult learning disability leaflet and video to help prepare patients coming for the test. Had just organized before all out-patient clinics were cancelled.

Results:

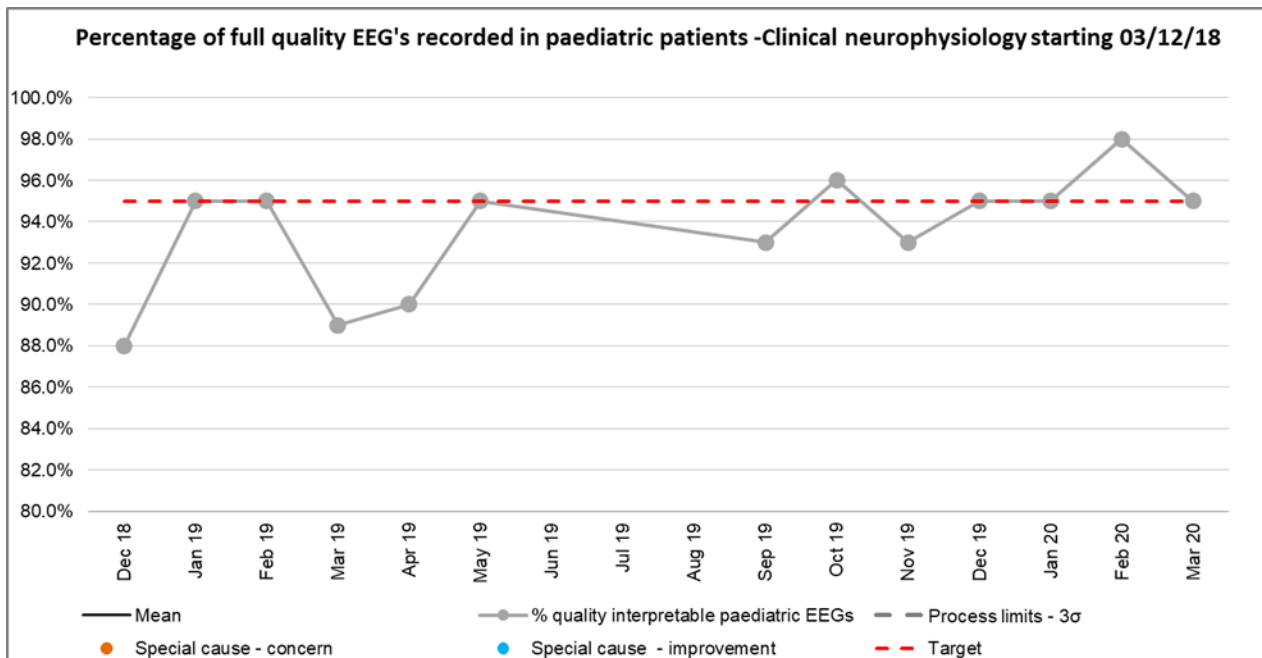

1. Too soon to get feedback from patients about additional resource and whether they have accessed.
2. Have started to look at and plot our results.

Graph 1 below shows how we were initially able to improve our wait times after our EQIP training. Unfortunately the knock-on effect of Christmas annual leave, reduced patients due to re-flooring and staff using annual leave at the end of the financial year has meant that we have slipped

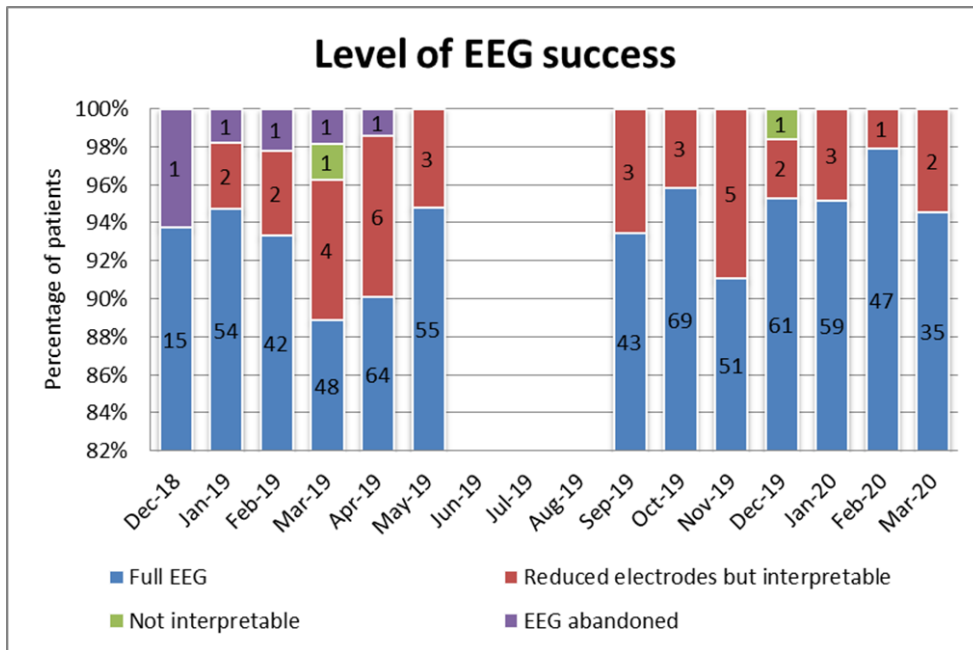

Graph 1

Graph 2 below shows an increase in the percentage of patients that we have been able to record a full quality EEG. (Note missing data for June-August). We have hit our target of over 95% since our EQIP training. Additionally we have not had to abandon any recordings since starting the project, (Graph 3)

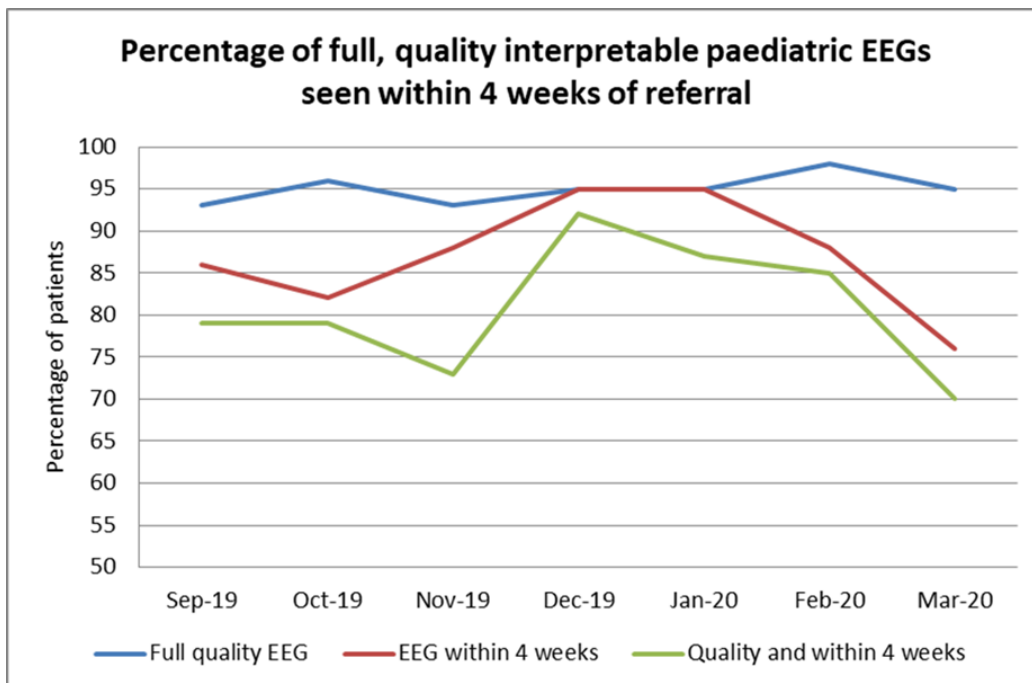

Graph 2

Graph 3

Plotting both these together in graph 4 shows us that it is the wait times that have affected our overall ability to meet our aim but great that we have been able to make a difference by communicating with each other and families to improve quality and hopefully experience for our patients.

Graph 4

Challenges Successes:

1. Still struggling to make the phone calls to patients (mainly due to time) so have started sending out an addendum to our patient leaflet (as above in planned tests) – obviously this is on hold.
2. Everything now on hold as we wait to start booking out-patients once more.
