

Epilepsy quality improvement programme

Innovations to improve care for paediatric epilepsy patients

The Epilepsy Quality Improvement Programme brought together just under 20 paediatric epilepsy teams, supporting them to make sustainable improvements within their services.

Please join us on **17 March 2022 from 12:30pm** to hear from your colleagues and all of the EQIP teams about: how they used quality improvement in their service; what they learned and achieved; and how they have adapted under the pressures of a pandemic. The event will be hosted online via Zoom.
